

TRAIN

To set up a project, a good plan is necessary for a good insertion. For this, it is necessary to choose a pedagogical method. We can see from the picture above that not all methods are equally effective.

Thus we will prioritize the Teach Others, Practice, Group Discussion and Demonstration method.

Our training will involve different people : City Hall employees, police, Batman and citizens. And it will consist of 3 main points:

LO

1. Understanding the project: Rationale, objectives and challenges

In order for change to occur smoothly, everyone involved must be aware of "why this change is necessary".

2. Understand each other's roles and responsibilities

It is important to remind everyone of their role and for everyone to realize how important their role is: to encourage them.

3. Understand how to manipulate the tools

Now that everyone is convinced of the need for change, now that everyone knows their role, it makes sense to show them how to use the tools they will be using on a daily basis.

Materials

To carry out the proposed activities, we will need a list of materials which is the following:

- 1) Post-it and pens
- 2) Meeting room with chairs and tables
- 3) Video projector
- 4) Tablets and desktops

Activity

LO#1

The first activity will consist of familiarizing oneself with the project, understanding the reasons, the objectives and the stakes of the project. For this, each person will have to write on a paper, a post-it, the problems that the city has with its waste and how each person feels about it. Then the mediator will read the answers and people will debate on each idea.

Materials used: #1,2

Duration : 1 hour

LO#2

Pour cette activité, on effectuera une mise en situation.

On forme des petits groupes de 3 à 4 personnes.

On diffuse une diapo pour expliquer différents cas et on met en place des mises en situations. Les groupes doivent donc participer en donnant des solutions. Ceux qui ont des avis diverges vont s'expliquer avant que le médiateur les départage en apportant plus d'explications.

Materials used: #2,3

Duration : 1 hour

LO#3

Our last activity consists of getting to grips with the different tools that will be used.

We divide the members of a department into pairs and test the different tools they will be using. In each department, there will be a facilitator who can be helped by the members of the department who understand and assimilate their task more quickly.

Materials used: #2,4

Duration : 1 hour
